Section XV

Chapter-78

CHAPTER 78

LEAD AND ARTICLES THEREOF

NOTES:

1. In this Chapter the following expressions have the meaning hereby assigned to them:
 - a) *Bars and rods*

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products, which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.
 - b) *Profiles*

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.
 - c) *Wire*

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including square), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of

such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width.

d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- (i) Of rectangular (including square) shape with a thickness not exceeding one-tenth of the width;
- (ii) Of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7804 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUB-HEADING NOTE:

In this Chapter the expression “refined lead” means:

Metal containing by weight at least 99.9% of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE – OTHER ELEMENTS	
Element	Limiting content % by weight
Ag Silver	0.020
As Arsenic	0.005
Bi Bismuth	0.050

Ca	Calcium	0.002
Cd	Cadmium	0.002
Cu	Copper	0.080
Fe	Iron	0.002
S	Sulphur	0.002
Sb	Antimony	0.005
Sn	Tin	0.005
Zn	Zinc	0.002
Other	(for example Te), each	0.001

Exim Code	Item Description	Policy	Policy Conditions
7801	UNWROUGHT LEAD		
7801 10 00	Refined lead	Free	
	<i>Other:</i>		
7801 91 00	Containing by weight antimony as the principal other element	Free	
7801 99	<i>Other:</i>		
7801 99 10	Pig lead	Free	
7801 99 20	Unrefined lead	Free	
7801 99 30	Unrefined lead alloys	Free	
7801 99 90	Other	Free	
7802	LEAD WASTE AND SCRAP		
7802 00	<i>Lead waste and scrap:</i>		
7802 00 10	Lead scrap, namely the following: Scrap lead-soft covered by ISRI code word 'Racks'; Mixed hard or soft scrap lead covered by ISRI code word 'Radio'; Lead covered copper cable covered by ISRI code word 'Relay'; Wheel weights covered by ISRI code word 'Ropes'; Mixed common babbitt covered by ISRI code word 'Roses'; <i>Lead battery plates whether automotive, industrial or mixed covered by ISRI code word 'Rails'; Scrap drained/dry whole intact lead covered by ISRI code word 'Rains'; Battery lugs free of scrap lead, wheel weights, battery plates, rubber or plastic case material and other foreign material covered by ISRI code word 'Rakes'; Lead covered copper</i>	Free
